Product price:

\$85.70 tax included

Product short description:

A classic in the world of lamp shades, reinterpreted by Creative Cables. This traditional industrial style pendant light shade would normally be made from metal. However, we have flipped that around and taken the unusual step to recreate this quintessential style pendant lamp shade into ceramic form. A new classic is born.

Created and decorated by hand entirely in Italy, this lamp shade with industrial design will be perfect to light the table of a kitchen.

Choose the solid-color enamelled versions to give an extra touch of elegance to your dining room, or opt for one of the special paints, such as corten effect rust or cement, for an industrial style effect and a minimalist design. The craftsmanship to which these **ceramic lamp shades** are subjected means that the paint can be slightly different from one another, making each lamp shade a unique piece!

Complete your pendant lamp by choosing one of our E26 socket with ferrules and the fabric covered electric cable of the color that best matches your furnishing needs.

Attention! Bulb and socket NOT included.

Product description:
