Product price:

\$22.10 tax included

Product short description:

A modern and sophisticated style complete with elegant finishes: the E26, milled aluminium socket kit with a gunmetal grey finish is a high valued detail, perfect for refined spaces.

The socket kit is provided with a cable clamp. Thanks to the ferrule, you can actually use it with all E26 lampshades: we personally like to match its gunmetal grey finish with our enamelled metal lampshades or the naked cage lampshades!

These are single ferrule light sockets. "What's a ferrule?" you may be thinking. It's simply another name for a ring. And these light bulb sockets have a single ferrule at the bottom of the socket that can screw on and off. And while there isn't a second ferrule at the top, the socket cover itself acts as the top ferrule. So you can use this socket to mount all types of pendant light shades and plugin pendant light shades that have a opening diameter of 1 - 5/8 inches to 1 - 3/4 inches.

These light bulb socket kits come with a built-in matching strain relief cable clamp, and work great with our cloth covered wire pendant light cords. We think these knurled light bulb sockets look especially good with our cage pendant light shades.

UL Listed: E190302

Be sure to check out our tutorial videos to learn how to wire up this Knurled Aluminum light bulb sockets

Product description:

Knurled aluminium.

The kit consists of:

1 - E26 socket in IMQ ENEC certified thermoplastic Made in Italy.

1 Milled aluminium body, ferrule for E26 lampshades and integrated cable clamp.

Dimensions:

Diameter: 1- 15/16 inches (48 mm)

Height: 2 15/16 inches (74 mm)

UL Listed: E190302

Note that the interior light bulb socket has a built-in locking safety device that does not allow you to unscrew it once assembled. (This is to protect you from electric shock.)

We ship all our light sockets

not fully assembled and twisted closed

so that the built-in locking safety mechanism is not "locked" when you receive it.

If the safety device does somehow become locked you can unlock this security system, located inside the socket on the side, with a small screwdriver. Please see our tutorial page for videos on how to unlock these light bulb sockets. And If you attempt to unlock the socket you must have the power

Disconnected

to the socket before inserting anything into the socket!

Product features:

Material: Aluminium

Ferrule: Yes

Fitting: E26
