Product short description:

Do you want to give your living room an original touch? Do you like **industrial style** and would like to apply it to the lighting of your interior? Do you love raw materials and playing with unique decorative elements? Then this pendant lamp with concrete lampshade is perfect for you!

Cement has imposed itself in recent years as a real and proper furnishing element inside houses and apartments because it is able to give a strong personality to the environment in which it is inserted. The Funnel lampshade, with its rounded shapes and minimal design, is an ideal element to bring the industrial style you love to your rooms and change the look of your interior. We advise you to **use it to light a table made of wooden planks**, to furnish a dining room with a contemporary style or a kitchen with exposed wall units.

This chandelier is ready to be installed by expert hands and you can buy it already **complete with bulb**: we have chosen for you a transparent Edison ST64 LED light bulb with long filament which diffuses a warm light inside the lampshade, but alternatively you can take a look at our assortment of LED design bulbs to find the one that best suits your needs

PLEASE NOTE: Some of the images shown are examples of multiple pendant configurations that can be created by purchasing multiple suspensions. The item for sale is a lighting installation with only ONE pendant.

Product description:

Hanging lamp composed of:
120 cm of cable 3x0.75 of the selected color
1 metal canopy of the selected finish
1 E26 double ferrule bakelite socket
1 Concrete Funnel lampshade of the selected finish ø 200 mm H 260 mm

Light bulb [DG-ST64-CLEAR]: LED, ST64, 5,5W, 250 Lm, 2200K, E26, width 64 mm, dimmable

You can also purchase this lamp in the Matter-integrated version, for lighting control with your voice or the apps you already use regularly. Turn the lights on and off, create automations, and make your lights interact with other smart home devices easily and without the need for installation.

NOTE: If a wall switch is connected directly after the line cable, turning off the lamp will also cut off power to the Matter switch. Consequently, it will no longer be able to receive commands via

voice or app. However, once the light is turned back on from the wall switch, the Matter switch will be powered again and resume normal operation.
