Product short description:

Named the best round pendant lamp shade in the world by a leading design publication, the round Foldi Shades bring instant style and beautiful lighting to any room.

Each Foldi Shade is made by hand by an artisan who has spent years learning the craft. And Foldi Shades is committed to supporting these artisisans by being Fair Trade Certified and guaranteeing a living wage to all makers of these amazing hanging pendant light shades. These shades are not made in factory, but in our artisans homes. And with every purchase you make of a Foldi Shade you are supporting a family and traditional way of life.

- small = 10" in diameter
- large = 14" in diameter
- XL = 16.5" in diameter

All of our round Foldi Shades come folded in a beautiful box and include two balloons and a mounting piece so that you can hang it on your pendant light. It only takes a few moments to open the box, unfold the shade and place a balloon inside the shade and blow it up. After that you simply spray it down with water, tie it up and let it set for a few hours to harden.

After that all you have to do is hang it from any pendant that uses an E26 base (normal sized) and bulb. Mix and match multiple colors, shapes and styles of Foldi Shades to create the look that's perfect for your space. And these are perfect when usede with either hard-wired pendant lighting or with plug-in pendant lights.

For a beautiful glow we recommend using a globe shaped G25 Matte White LED light bulb with your shade. This will allow the light to be dispursed and give your shade a beautiful glow.

*IMPORTANT - Only use Foldi Shades with LED bulbs.

COLOR NOTES:
During different parts of the day the colors of the lamp shades can appear at times to be different hues than shown in these photos. We have make our best attempts to provide realistic photos but understand that some of these shades will appear darker when not in a room with much natural light, or in the evenings.

Here are a few examples
- Latte is significantly darker when not in a sunny room.
- Beige has more brown undertones
- Cream is a buttery color with yellow undertones
- Dutch Orange is a bright and vibrant orange
