Product price:

\$23.60 tax included

Product short description:

Cage is a simple yet revolutionary component to create modular lamps in true Creative Cables style.

Made out of 4 elements, easy to assemble, Cage is a squared structure that cages the cables creating scenographic and original shapes, real floating sculptures.

You can use Cage separately or with multiple combinations. The possibilities of creating suspension lamps in different shapes are truly endless!

You will be able to switch up your lamp's shape and appearance as many times as you want, by simply adjusting the Cage's position or by adding more structures to it.

Cage is available in two sizes (Ø 1.3in e 1.9in) and in 3 colours: black and white in recycled plastic and transparent in polycarbonate . The choice of pairing your new lamp with our 3x18AWG cables is up to you!

A tip from us... use different coloured cables for a truly striking effect!

Patented. Designed by Marcello Ziliani.

Product description:

Plastic structure that comes with instruction manual - made, based on the selected, size from:

4 modules - 1.3in X 1.3in
