Product short description:

A versatile, eco-friendly, and creative lamp shade. Meet Cablò, a unique support crafted from recycled plastic and exclusively patented for Creative-Cables by Italian designer Fabrizio Alessio from Turin. It gives new life to leftover cable snippets that would otherwise go to waste, resulting in a colorful and endlessly imaginative lamp shade.

Will you choose subtle pale linen cables or a vibrant spectrum of colors? Either way, you'll receive Cablò in its multicolored version, complete with seven 19.68-inch fabric cables. These cables allow you to design a lamp shade that perfectly reflects your mood, from captivating geometric patterns to delicate floral inspirations.

What's even better? You can mix and match your Cablò as many times as you like simply by rearranging the cable snippets. Just open the two plastic shells, place the cables into the designated slots in any order you prefer, and close them up. With the built-in pressure cable-clamp in the buttonhole, you can attach Cablò seamlessly to any cable, right above the lamp holder.

Product description:

Technical specifications Cablò lamp shade:
