**Product short description:**

If you're looking for a fun and colourful E26 silicone lamp holder with switch to pair with your exposed light bulbs, this is the ideal solution for you. Long-lasting and made from high-quality materials, this product is soft and light whilst still maintaining flexibility. Additionally, thanks to the wide range of available colours, it's guaranteed to have striking yet functional results that adapt to any setting.

**Why silicone?**

Soft, long-lasting and pleasant to the touch. It can withstand high temperatures, chemical aggressions and oxidation. On top of that, it's also light and boasts excellent isolating properties: it's no wonder this material has captured the attention of interior designers and customers looking for something versatile and reliable.

**What are the advantages of a lamp holder with a rocker switch?**

The rocker switch is quite common in the lighting field: the oscillating button, once pressed, maintains the same position. It's a very practical component, easy to use and operate even with one hand. Choose a lamp holder with this switch to create fun and colourful wall lamps and if you need to turn your lights on or off without installing wall switches or circuit breakers.

**Where should you install this lamp holder?**

This silicone E26 lamp holder kit with hidden cable clamp by Creative-Cables will unleash your creativity in any setting by offering a wide range of pastel or vibrant colours. The cable clamp and hidden switch ensure the product's linear design no matter the colour palette. Visit our website to find a wide selection of silicone roses to help you create seamless lamps with matching colours.

**Want to use this lamp holder for a wall lamp instead of suspension lamp?**

The E26 silicone lamp holder can be installed with joints, extensions or Creative Flex that require a M10x1 threaded tube. So we decided to add a specific plastic accessory to the kit to replace the cable clamp. This component will allow the silicone cover to maintain a perfect shape for any kind of lamp.

Add personality and flair to your lighting and make your home even more welcoming and colourful with the Creative-Cables silicone E26 lamp holder kit.
