Product price:

\$18.00 tax included

Product short description:

From today you can create your own custom outdoor lamp thanks to EIVA.

The heart of EIVA is the world's first wirable socket suitable for wet locations: thanks to the special insulating gel contained inside and a membrane that rests hermetically on the bulb, this socket is able to withstand rain and storms in complete safety.

Made of plastic, this socket is suitable for both light bulbs and lampshades with E26 connection and can be purchased in its "naked" version or in a kit, complete with a soft touch silicone cover available in two different shapes and many colour variations.

The EIVA Outdoor lighting system is entirely designed by Creative Cables and will allow you to light your outdoor spaces, like gardens, patios or terraces with customized and unique solutions.

Configure and complete your EIVA system:

- Choose the version of socket that best suits your needs, naked or with soft touch silicone cover.
- Match the silicone soft touch ceiling canopy suitable for wet locations in the color you prefer.
- Complete your outdoor lighting with Creative Cables lampshades, accessories and light bulbs.

Each EIVA component is an international patent by Creative Cables.

WARNING: The wet location EIVA socket is only compatible with glass LED light bulbs and has been tested for compatibility with A19, ST21, G30, and G40 bulb shapes.

Product description:

Kit composed by E26 UL listed socket and protective thermoplastic shells pre-filled with insulating gel for fixtures and lamp that are suitable for wet locations

Diameter: 2,2"
