**Product short description:**

Seeking lighting to brighten your deck dinners? Need outdoor lighting for your porch? Want to create a unique ambiance in the garden with lighting that reflects your personal style? With EIVA pendant lighting, you can transform your outdoor spaces, relying on the safety of a fully waterproof product.

This individual pendant lamp features the socket and ceiling canopy from the EIVA line: top-quality components tested for wet locations. These components are exclusively designed and patented by Creative Cables.

Thanks to the essential lines and minimalist design of the oversize Dibond® Ellepì lampshade, you can create a contemporary style in any environment. Choose the lampshade finish that best suits your needs: aluminum for industrial style enthusiasts, matte white for those looking for a single color, black available in either shinier or matte finish, or the double-sided copper and brass version for giving your outdoor space a vintage look, or for changing the style any time you feel like it.

The ceiling canopy of this light can be wall or ceiling mounted, allowing you to utilize the connections of your existing electrical system, while, thanks to a decentralizer, you can decide where to hang your pendants, providing lighting exactly where you need it.

This chandelier comes ready for installation and can be purchased complete with a bulb. We've selected a G40 LED bulb. Alternatively, you can customize your lamp with one of LED bulbs from our collection.

**WARNING:** The wet location EIVA socket is only compatible with glass LED light bulbs and has been tested for compatibility with A19, ST21, G30, and G40 bulb shapes.

*Every Creative Cables lamp is designed and assembled in Italy, tested by independent laboratories, ensuring compliance with the strictest regulations. Another reason to trust Creative Cables quality.*
