**Product short description:**

If you're looking for a customisable and practical illumination solution for your terrace or garden, the outdoor UV resistant cable with Creative Cables fabric lining is the perfect solution for you! Not only these cables are compatible with the EIVA system, which guarantees protection against water, humidity and rain, they are also UV resistant.

These Creative-Cables outdoor UV resistant cables are equipped with a flexible conductor in red electrolytic copper with a double elastomeric rubber coating which allows the product to withstand temperatures ranging from  $-25^{\circ}\text{C}$  to  $+60^{\circ}\text{C}$ . When used as lining for UV resistant cables, the fabric will both bedeck and help you customise your outdoor spaces. A refined, charming colour for timeless and weather resistant illumination.

The entire collection of outdoor UV resistant cables was designed with the EIVA Outdoor illumination system in mind. Choose a socket, a ceiling canopies or a lampshade by browsing our website, and create your outdoor suspension lamps for a customised illumination solution.

The Creative-Cables outdoor UV resistant cables are 100% Made in Italy and IMQ-HAR certified. The design and material choice aimed to achieve three targets: safety, flexibility and weather-resistance.

What does UV resistant cable actually mean?

It means the fabric used to line these cables was designed to not only endure but fully resist UV rays, which make up around 10% of sunlight. The colour of UV resistant cables remains vibrant and doesn't tend to fade over time, even when they are consistently exposed to sunlight. This also means that prolonged exposure to sunlight will not result in the deterioration of the product's materials and performance.

**Product description:**

2x1,00 neoprene cable H05RN-F with fabric lining.

Diameter 7,6mm 2x1,00 Green Pixel Bronte SX08 cotton.

Legal reference EN 50525-2-21.

European Low Voltage Directive N. 2014/35/UE.

IMQ-HAR certified N. CA01.00683.

Flexible class 5 conductor in electrolytic red copper, in compliance with IEC 60228.

Isolation Elastomeric rubber EI 4 in compliance with EN 50363-1.

Insulation color in accordance with HD 402 and EN 50525-1 requirements.

External elastomeric rubber sheath in accordance with EN 50363-2-1.
