**Product price:**

\$62.80 tax included

**Product short description:**

An artisanal lamp that combines design and functionality in a unique piece, with a lightness that goes beyond mere formality. The conical base is handcrafted in Italy with alder wood, skillfully worked to enhance the natural beauty of its grain and to add warmth and elegance to the environment. Moreover, it is untreated wood on the surface: to be used as is, or painted as desired.

The lamp is equipped with the iconic high-quality textile cable by Creative Cables, also made in Italy, which adds a further element of refinement and, thanks to the variety of colors, allows it to discreetly fit into any environment. The globe-shaped light bulb completes the design with its warm light, creating a welcoming and relaxing atmosphere.

But there's more: this lamp hides a secret, which lies in its ability to transform. Simply by unscrewing the light bulb, it can be easily detached from the wooden base and hung in any part of the house, allowing it to be moved according to needs. Maybe twisted around the bookcase in the study or on the coat rack at the entrance, for a boost of light only when and where needed.

**Product description:**

The lamp is composed of:

- 7ft UL Listed cloth wire 3x18 AWG in the selected finish (2ft lamp/switch, 5ft switch/plug)
